

Kareem Hassanein

MSc PT | BSc Kin

Hamilton, ON | 905-975-5797 | kareem.hassanein@gmail.com | kinetikarephysio.com

Profile

Clinical operations and implementation specialist with 5+ years driving workflow optimization, software rollouts, and process improvement across multidisciplinary clinical and professional services environments. Track record of client acquisition, retention, and caseload growth generating \$600K+ in clinical revenue and 8,000+ hours of client-facing delivery. Proven ability to lead adoption of new systems, reduce clinician documentation burden, and deliver measurable operational gains across clinical, legal, and med-tech environments.

Marketing, Customer Acquisition & Retention

- Built and scaled a local SEO acquisition engine across 6 service lines and 8 GTA municipalities, publishing condition-specific pages, implementing technical fixes, and deploying schema to increase multi-service patient discovery
- Designed and implemented conversion flows from service page to booking, adding CTAs, structured funnels, and automated review capture integrated into the practice management system to improve lead-to-booking conversion
- Increased positive Google reviews by 125% over 12 months for a private physiotherapy clinic by implementing QR-based feedback capture embedded into the patient visit flow
- Established referral relationships across 5 allied health disciplines and implemented repeatable outreach and follow-up workflows that increased physiotherapy caseload in a multidisciplinary clinic
- Top revenue-generating clinician for 3 consecutive years (team of 6), generating \$600K+ through retention workflows, consistent throughput, and high rebooking rates
- Ranked #1 in Halton-Niagara for personal training sales (\$230K in 14 months) by improving consultation-to-close conversion and building long-term retention routines
- Generated \$145K in personal training revenue over 8 months through client acquisition and retention execution, recognized as top sales performer company-wide

Digital Transformation & Operations Improvement

- Led end-to-end rollout of Heidi AI (evaluation to go-live), driving 100% clinician adoption in 8 weeks, reducing documentation by ~3 hours/week per clinician, and eliminating ~\$20K in annual admin cost
- Mapped intake, drafting, and client communication workflows to surface bottlenecks and translate findings into automation-ready requirements and implementation priorities
- Built an LLM-based drafting automation system (Claude Code) that cut document generation time ~85%, improved consistency through SOPs, and enabled scalable reuse via a template library
- Built and launched a healthcare web platform (Next.js) with integrated booking, Google Reviews API, and AODA-compliant accessibility; implemented CI/CD via GitHub and Vercel
- Redesigned booking and scheduling across 6 specialties with multi-provider availability, reducing intake friction and accelerating time-to-appointment
- Designed and launched a clinic website with service pages, provider profiles, and integrated booking aligned to service-line growth
- Conducted clinician workflow review for a medical device startup, documenting usability friction and delivering integration recommendations to support deployment readiness
- Led monthly operating reviews for a 25-person team, converting corporate targets into weekly execution plans; monitored daily revenue and retention trends to deliver targeted coaching interventions

Physiotherapy & Personal Training

- Managed 250+ patients annually (6,000+ sessions over 3 years) while improving scheduling efficiency, documentation consistency, and patient feedback capture
- Improved adherence and continuity of care by tailoring education, expectations, and progression plans to patient goals, barriers, and readiness
- Prepared physician and specialist correspondence to accelerate investigations, clarify clinical requests, and coordinate multidisciplinary care
- Delivered 2,000+ hours of 1:1 training, retaining clients through structured assessments, individualized programming, and consistent progress tracking/accountability
- Delivered operational and workforce analysis supporting CPA initiatives on physiotherapist retention and working conditions, collaborating directly with the CEO
